Subject: Re: CVP BO: Environmental Baseline sections

Thanks for putting this together Brian. Here's a couple items:

1. I attached the coho species status section. The baseline information I put in is fairly detailed and this could be trimmed, but we may want to beef up the portion that describes the TRD within the baseline in the coming weeks.
2. Reclamation determined Eulachon to be NLAA so we probable don't need a Eulachon section in the baseline if we are going to have an NLAA section later in the BO. I filled in those sections in the attached baseline but we may want to move those later.
3. There are no listed steelhead species in the action area so you can delete those headers.

Thanks and have a great weekend,

Seth

Seth and Justin,
Here's the early draft Env Baseline section for the CVP BO. It's basically the Cal Water Fix Env Baseline, which I've started modifying for CVP. I'm sharing it with you so you can see the level of detail in the species sections and hopefully match that for sections on the coastal species to plug in here. Can you send me sections on coastal steelhead, coho, and eulachon? Or let me know who I need to coordinate with.

Thanks,
Brian
