**Subject:** Re: For review: ROC on LTO BiOp Section 2.2 Status of the Species and CH

Hi all,

Attached (and saved on the ROC drive) is my review of the SOS.

There are some updates from recent years needed for w-r and s-r, so I would like to take a quick look at it again.

My recommendation (to the drafter?) was to check with Amanda on the updates.

thanks,

Naseem O. Alston

All,

Please review the subject section, attached (14 pages), and send back any track changes by COB Friday, March 29.

**Maria, Naseem, and Chris**--If you send back comments, please indicate whether you are clearing, or would like to see a revised draft. If you opt on not reviewing, please let me know.

**Rosalie**--In our review and clearance chart, the Status of the Species and critical habitat section was slated for Naseem for the section 7 review, but you're welcome to review.

If you have any track changes, please save the file with the same file name, along with your initials at the end.

**Dan**--Please send over a short version of the status section for Southern Resident killer whales to include.  
-----

Also attached is the long version of the status of the species and critical habitat that will be Appendix B . Feel free to review that document, too (108-page file starting with "CCVO..."), but if you do, please let me know

ahead of time. We are concurrently working on including "cite while you write" citations to EndNotes. As this version provides additional details that aren't critical to the base Opinion, I'd be OK with getting any track changes back by COB Friday, April 12.

Thanks!

-Garwin-
