I have attached my comments, but Brycen did a great job, so not much to add. The main issue I think we are going to run into here is what they want/mean when they ask for model "validation". We can address much of this in detail at the meeting on the 25th if that happens.

Eric

Thanks Eric. Yes please---we are hoping to be able to provide these responses to attendees in the next week, so input from you is still needed and timely.

Thanks,
Christina

Hi Christina,

Sorry, I was on leave all last week. Do you still need this input from me?

Eric

Hi Eric,

Just checking in to see how these are going. Appreciating you are super busy, if you could let me know when you think you might be able to have a draft of the getbacks ready to share, we'd really appreciate it.

Thanks
Christina

Hi Eric,

Just following up with you as Garwin, Brycen and I pulled together our notes from last Friday's meeting on science and modeling.

I think you were on the phone at the beginning of the meeting, but in case you weren't, Jeff discussed having some sort of written followup for attendees so that they could see the information that we captured during the meeting and got responses to any outstanding questions. We still haven't quite figured out what

we are going to send, but in typing up notes, we did identify some questions that we felt were left somewhat unanswered and would benefit from follow-up written responses distributed to the group.

In the attached notes, you'll see that we flagged these with boldface "getback" text. In addition, when Brycen reviewed the notes, you'll notice that he took a first stab at addressing the questions, to hopefully save you some time in response drafting. Thanks Brycen!

Taking Brycen's start, could you please work to round out responses to each of these getback questions? I think drafting the responses in a separate word document might work better for future distribution (as opposed to drafting answers within this document).

Thanks for your help. Also, if you have any comments on the notes themselves, please feel free to redline this document---these are just the notes that we collectively captured, so any additions you had would be greatly appreciated.

Thanks,
Christina
