**Subject:** Sufficiency Review Update and plan for Friday's meeting

Hi all --

**Sufficiency Review Update:**

Have updated the [ROC daily update](#) with links to our revised sufficiency review docs (one for PA issues, a separate doc for Effects Analysis issues). Howard, Garwin, and I have focused on Shasta and Delta sections but plan to, if time allows, transfer over the highest-level comments from the other divisions as well. **Still doing some wordsmithing on these docs -- please don't edit but contact us if you see something awry...**

**Friday's meeting (2/22/19, 9-4:30):**

**Materials:** We plan to e-mail (and bring hard copies) of the revised sufficiency review docs (see links in ROC daily update).

**Schedule:** We don't have a specific agenda but are going to suggest that we cover Shasta/Sacramento issues in the morning, Trinity (at least the NCO issue) at 1pm, and Delta in the afternoon. Will also touch on need for Chinook production for SRKW analysis. We will cover issues from other Divisions as time allows. FWS and CDFW are meeting with Reclamation today and we've heard that they are kicking some issues to tomorrow's meeting, which they plan to sit in on. So, at some point there may be some discussion of "common-interest" items with FWS and CDFW.

**Who does what:** Howard will kick off with some general remarks. Might be some opening remarks from Reclamation. We'll then walk through our revised sufficiency review docs row by row; capturing answers/resolutions as we go. I'll facilitate the walk-through, but encourage Division leads (or anyone!) to weigh in with comments or clarifying questions.

**Outcomes:** Quick things can be resolved during the meeting. However, because of time limitations, we won't have time to get full answers for many of our issues during the meeting; we just want to make sure that Reclamation understands what info we want, and will note whether or not Reclamation will be able to get the info to us in a timely way.
