Subject: NMFS ROC LTO Needs - Temperature Analyses

Reminder that we have the 2-4pm meeting next Tuesday to go over Reclamation's temp modeling assumptions/results and also some "case studies" that, i think, will review in detail some sample temp management specifics from different water year types. We also have, from 10-12 that day, a conversation about storage management and allocations logic.

As we discuss temp analysis/interpretation needs; we should capture any specific questions or info needs we should request at EITHER of next Tuesday's meetings.

NMFS ROC LTO Needs - Temperature Analyses

When Fri Mar 1, 2019 3pm – 4pm Pacific Time - Los Angeles

Where NMFS - WCR - SAC - Conf Line 5- 866-734-4849 Passcode: 8246753, Sacramento - LgConf - Delta ([map](#))
