Subject: Update from Jeff S. on Delta Effects

Some of you may have received a VM with a similar update, but I talked with Jeff this morning and told him I'd pass on this update.

Jeff is on leave this week. He has his work laptop with him, but has not been able to connect his laptop to the hotel wifi. He will check e-mail occasionally on his phone.

The Delta Division had a lot of project components -- as organized in Table 4-6, 12 primary components and 16 additional components. **Update on status is provided below and in the attached; let's discuss at the check-in meeting or later today.**

- 14 of those components are on track to be complete by 3/28/19 (see green highlights in the attached annotated excerpt of Table 4-6).
- 6 site-specific project components need help to be completed (see pink highlights in the attached annotated excerpt of Table 4-6).
- 8 programmatic/AM components (most with minimal description) also need help to be completed (see blue highlights in the attached annotated excerpt of Table 4-6).
