Subject: Fwd: Update on Delta effects analysis -- status by project component

Cathy,
Jeff is definitely behind on his analysis and we are wondering if perhaps Joe has the time to take on some of this. In particular the project components highlighted in blue. Maybe the three of us (you, me, Garwin) can discuss this afternoon.
Howard

Jeff -- See the attached for the assignment status based on our discussion after the ROConLTO check-in meeting this afternoon. Green=things on track to be done by 3/28; Pink=things back on your plate due 3/28; Yellow & Blue = things reassigned to others.

Bottom line? Please send write-ups for "Agricultural Barriers" and "Clifton Court Predator Management", on the original timeframe of by COB Thursday, 3/28. Please focus on the key effects necessary for the I&S section (e.g., maybe the details of predator management don't matter too much because survival doesn't seem to be much affected?) and incorporate the deluge of materials we got by reference rather than try to do a detailed summary.
