Subject: Re: HB/CM - please review

Ok, sounds like it would be helpful for Garwin and I to talk through it anyway.

Next steps - "final draft" language gets incorporated into EnvB section, and the front end to effects section can be added whenever appropriate.

The key for each division is how specific to get (I was thinking of not calling each out, but can talk to Garwin about that).

And when/who to include a discussion within each division.

So - agree - not thinking this needs to get sent out - just that it would be great for the 4 of us to agree on the approach.

I think we are generally good with it, and we thought we'd NOT send it out to staff right now to keep from distracting them. What are you thinking for next step if you consider it signed off?

Hi Howard and Cathy,

Would be great to get your eyes on this draft approach sooner than later.

Handling table 4-6 and appendix C in the EnvB and Effects (1 page)

Garwin has reviewed it, his comments (with a few responses from me) are in the attached version.

I also placed it here for now:

R:\Draft BiOp\2_ESA

Can we four meet to talk through it? Or me and Garwin after you two have reviewed?
