Good morning....

The "area" of concern is bottom of p. 33 through table 2.1.3-2. I left the tracks that show what I most recently changed: notably, I removed my "generalized" bullets of magnitude of effect categorizations and related text, removed rosalia's suggested figures, and offer potential revisions to the table (in comment bubbles).

On p. 27, there's a comment bubble attributed to me but I pasted in Maria's comment, which begins like this: "From Maria: "I am confused by this paragraph. I thought we dealt with this issue in 2009 biop - - that we didn't not want to inappropriately conflate jeopardy standard"

Can you think about that one?
