**Subject:** Analytical Approach for I&S Meeting

Subject doc is ready for I&S meeting. It has not been fully revised, but the sections that I think are most useful to the team (discussion of the tables, bottom of P. 33 through P. 38) that is not general "VSP" descriptions, has been revised.

Note there are still some tracks b/c Rosalie offered a figure but I don't think it does the trick. I've revised text and am looking into revising the table to make it more clear. But I think the team gets it, and I think they can use it.

Here (same as what I sent Garwin separately) and on server.
