Subject: Re: ROC effects tables for I&S section

Attached is an optional excel spreadsheet to compile your I&S table info. No need to change to this if you've got your tables started already (using the columns in the Analytical Approach), but use of this excel template is encouraged if you are just getting started.

Reminder that guidance on filling out the I&S table is provided in the Analytical Approach. The latest "V5" version (saved in: R:\Draft BiOp\2_ESA\2.1 Analytical Approach) covers the table for effects to species on p. 33-37, and the table for critical habitat on p. 43-44.

All,

Thank you to those of you who have completed your effects (species and critical habitat) tables for the integration and synthesis section. If you're done, please make sure they are in the folder S:\Draft BiOp\2_ESA\2.8-2.9 Integration and Synthesis and Conclusion.

If you're not done, please make it your highest priority to finish them. If that means dropping other things that may be really high priorities, please make sure to discuss with Howard, Cathy, and/or me first, as we want to know what will be dropped or postponed. Also, if these tables are in the works, or if you haven't started, please reply with your ETA for completion. I'd like to establish a deadline of COB tomorrow for the task, but don't know where everyone's at with it.
