Evan and Garwin - -- This is a really good start and I think tracks well from the PA/BA. The problem is that Reclamation didn't really describe any effects of their operations on storage and the volume of cold water for management. So you will need to fill that in with information we have in house (and we have plenty). I've tried to provide some comments that I hope are useful. Call me anytime - - don't stress on these. We will get there, and I will help you.

- Maria

Maria,

In consideration of time, I'm sending you the Shasta effects section with my comments (only the species analysis--I haven't reviewed the critical habitat analysis yet) for your initial review.

Naseem is continue to incorporate some comments into the environmental baseline section. I will be sending that section to you first thing tomorrow morning.

Hi Garwin,

I'm having trouble accessing the ROCON drive via VPN so I've attached the Shasta effects section (with some place holders that I'll fill today) to this email.

Thanks,  
Evan
