Hi Janice, I don't think this changes how we've analyzed effects in our current draft of the BiOp, so I don't have a problem including this in the PA. I recommend checking with NMFS and if they are ok with it, then move forward with incorporating it into the PA. Thanks for checking in and being sensitive to workload.

Jana per my voicemail, attached are the edits that DWR is proposing to the Aquatic Weed Removal section of the proposed action. we wanted to consult with you on whether it would be ok to add this language to the proposed action. We did not want to surprise you or cause additional workload so please let us know if there are any concerns. We do not plan to conduct any additional effect analyses, so please factor this when letting us know whether is ok or not to add this language as part of the revisions to the BA proposed action.

Take care, Janice
