Subject: Re: ROC on LTO East Side Division effects analysis

Adjust!

We're going to reassign SRKW review to someone else. Please focus on incorporating my track changes. Let's chat first thing tomorrow (I'll be in ~8:15 a.m.), make it targeted.

Tentative ETA: Late Monday (4/29) evening (assumes Friday, and half each of Sunday and Monday to work on it).

Today (Weds) I planned to finish the "Conditions" summary, tomorrow (Thurs) I planned to finish detailed review of the SRKW effects and I&S section. **Let me know if I should adjust my workload sequencing.**

I'd like to discuss some comments with Garwin in the morning (he's out the rest of today) to be sure we're on the same page about the scope of revision requested. Answers to those questions may affect my ETA.

Barb,

My track changes to the East Side Division effects analysis are saved in the file "2.5 and 2.6 East Side Effects V4--GY" in the CVP ROCON drive. Please scan over all of my track changes, and especially the comment bubbles, in order to get an idea of the types and extent of comments that I have. Then, "reply all" with an ETA for a revised document. Maria flagged the East Side Division effects analysis as one that she wants an

advanced viewing of, so time is of the essence. Please don't stew over my comments and feel the need to do a deep dive with explanatory text and clarifications.

As you work through my track changes, please make sure track changes is on the whole time, then:

- Accept all edits and deletions that you agree with (including in Kristin's DO section).
- Don't accept any edits or deletions that you disagree with, but insert a comment briefly explaining why.
- Delete all explanatory comments. Those should either be moved to your memo, or included in text.
- If you incorporate a comment, reply to the comment simply with 'done.'
- If you have a long explanation to a given comment, think about including that explanation into the text of the document, as my comment and your response won't be included.
- You have multiple placeholder comments about consistency with temperature metrics and analyses. Please move that placeholder to your parking lot document, then delete those comments.

Thanks.
