Subject: Re: ROC LTO - spring-run I&S draft complete - ready for initial review

Not sure what y'all's plans are, but depending on how long reviewers are back logged and unable to look at spring-run I&S right away, now might be a good time for division leads to revise the effects table. I flagged most rows/cells that need fixing, and otherwise made track changes for the division leads to accept. Let me know if you want me to reach out to division leads on this - could do so one at a time to manage version control.

Hey Everybody -

Ready for review:
2.8 Integration and Synthesis ELLROTT SR V1 srb

I went through and updated formatting and did some Word "magic" (or mistakes). I am sorry, but I forgot to "Track Changes" initially, so you can't see what changed from Brian's initial version.

I deleted out the winter-run text that was left in the spring-run document to avoid confusion (perhaps I was the only one that might have been confused). If that was a mistake, Brian, please let me know and I will reinsert it.

I think the section is ready for content review at this time.

Susan

Hi all,
Happy Thursday. Many apologies for this being so so late, but the subject section is finally drafted. I recommend Susan do some MS word magic before people begin reviewing this.

Susan,
Name your price for fixing the formatting nightmare I created. Truly sorry.

The file is on the server, in the I&S folder, with this file name:
2.8 Integration and Synthesis ELLROTT SR V1

Brian
