Subject: Re: Most recent Clear Creek effects revisions

Attached is the latest version. I cleaned up the new stuff (accepted edits, deleted comments that were addressed).

Here is the most updated version. In my first email I attached a backup version from my H drive that was a slightly earlier version that didn't have the geomorph flows.

I was afraid of that. This really needs to get done so we can move on to so many other things that need my attention and that you can help with. In addition, I really need regular and frequent updates, especially if you're not gonna meet a deadline. I need to carve out time for expected reviews and have stuff lined up, and when an expected document doesn't show up, it throws me and the process off.

I think you're headed home now. Have a safe drive and enjoy the down time.

Here are my edits to date; I'm spent for the day and still not through the comments. I added the geomorphic flow stand along section back in to this version but have not addressed your comments.

++Still do do, base flow comments, response to comments in geomorph flows, and critical habitat comments. ANd just general clean up with references and figures and tables.
