Subject: Re: Updates and effects sections needed-CLEAR CREEK

Got it. I was gonna check in with you mid day, but got distracted with so many other things. I was also thinking, again, that since I didn't hear from you, that you would be completely done when you sent the doc back. Again, please please please please (an extra please from last night's e-mail) keep me updated and apprised of your progress on a frequent/regular basis, especially if/since you're not gonna meet a deadline.

I'll review the species tonight, so don't mess with that section.

I have addressed as much as I can to this point, but need to take a break. There are still some formatting and citations that still need to be dealt with, and some additional comments and questions for you. I feel like some of the paragraphs need summarizes that say how likely thing will occur and the magnitude of effect.

I went through everything but critical habitat. After I take a break, I plan to work on that section only.

Please e-mail me your revised effects sections (obviously with my assumption that you're done, and place a copy in the ROCON drive).
Thanks.
