Subject: Re: Workload

The proposed action section of the BiOp is in the ROCON drive at S:\Draft BiOp\1_Introduction\1.5 Proposed Federal Action and attached. Please save in the ROCON drive as V4 before making changes. Appendix A is the full track changes PA that we got on April 22. We need to make sure that our characterization of the PA, in summary, matches Appendix A. There are also other comments and edits in the document that need to be cleaned up.

Make sure you use track changes.

Thanks.

Was organizing emails while waiting, and working with Brittany on clarifying sections/questions from her review of my section.

Yes, can you give me more direction on that?

Sarah,

What do you have on your plate now? If you have room, you could finish/sync up the proposed action section of BiOp with the 4/19 version in Appendix A.

I think Cathy said you have to be in the office in order to help out with references/End Notes, so hold that thought for next week.

Sarah—Please send the most recent version of the Clear Creek effects section to Brittany (I didn't tinker with it last night). She'll take over addressing comments [with you (and hopefully Naseem)] on stand by if she has any questions.

We'll send you some tasks that need a home.

Brittany—ASAP is the acronym of the day...and project.

I have addressed as much as I can to this point, but need to take a break. There are still some formatting and citations that still need to be dealt with, and some additional comments and questions for you. I feel like some of the paragraphs need summarizes that say how likely thing will occur and the magnitude of effect.

I went through everything but critical habitat. After I take a break, I plan to work on that section only.

Please e-mail me your revised effects sections (obviously with my assumption that you're done, and place a copy in the ROCON drive).
Thanks.
