Subject: Re: loss data

Thanks Barb.

Jeff,
Are you adding a loss table and associated discussion to the Delta effects section? If so, I'll pull/point from that to make sure the Effects section and I&S will be consistent and we don't have two of the same table in the BO.

Thanks,
Brian

Here they are. We didn't calculate the monthly loss for WR (since most are out by April - May when exports increase in the PA); let me know if you want that.

Barb,
If you haven't already, can you send me the w-r loss numbers? Seems like we'd want to use the loss numbers in the effects section (if not already there) and the I&S. To keep things tight in the I&S, I'm thinking of just replacing the salvage numbers with the loss numbers, rather than having both there.

Let me know if there's a problem with that.

Thanks,
Brian

I recommend the following summary statement for WR: "Estimated loss at Delta pumping facilities 6-36% higher in PA".

1. The "Entrainment Index", as used in the I&S, refers to the numbers in the column for "% change" [((PA-COS)/COS)*100], so the index itself isn't higher in the PA vs. COS, it's that a positive index means that salvage or loss is higher in the PA vs. COS.
2. The current tables in the I&S are the original numbers based on salvage. The numbers that Jeff and I crunched, and that I sent last night, are based on loss. The range based on loss is similar, but is 6-36 instead of 7-38 for the salvage-based numbers.

Jeff & Brian & Garwin -- holler if I have this wrong.

Thanks again Barb. Is this statement from the WR key findings still correct:

Entrainment Index 7-38% higher at Delta pumping facilities.

Annual loss for WR, SR, and steelhead summarized on the "Annual" tab.

Monthly loss for just SR and steelhead summarized on the "Monthly" tab; if you need the monthly table for WR too, let me know.
