**Subject:** Supporting docs for Delta edits: Annotated bibs for "Appendix DELTA BIBS"

Subject docs attached. At the moment I mention these in the text as material provided in a BiOp Appendix. Which approach do you recommend?

1. Package existing docs as an appendix (current approach in Delta edits; fast)
2. Combine existing docs into a single bib (removing any redundancy) and include as an appendix (pretty fast)
3. Condense both bibs into a "Delta science highlights" list of bullets, and include in the BiOp text (will take the most time)
