**Subject:** Re: [EXTERNAL] Calsim, CALSIM, CalSim....

Great! Thanks for the heads up. So many acronyms and alphabets swirling in our heads! I appreciate when someone says, "THIS IS THE WAY!". I will make those changes when I have the opportunity to get back into documents.

Also, I feel a little in between editing/citing/formatting options right now. Editors are flying fast and furious in most every document and Endnote is not accessible for me currently (Shawn JUST came by and is working on it). So, are there any documents where I am needed or tasks I should be focusing on?

Hi Susan --

I'm not sure how much we've encountered this, and I know I've not been consistent....but to add to the list of terminology is CalSimII.

Let's use that. Here's why:

There IS a CalSim3. So we should be specific on the number (and not just use CalSim).

Derek Hilts uses CalSimII, with cap S, so I'll take him as authority. I know for sure we have CALSIM, Calsim, and probably CALSIMII.

CalSimII love,
