Subject: heading home for dinner...

expect to be back at it around 7:30. I think I only have 1-2 hours of tweaks, depending on if I run into issues with the loss tables.

FYI, for your pop context write-up, attached is the worksheet with the loss numbers and pop estimates. I will be adding in (in-line in text) for WR, SR, and steelhead:

- (a) annual combined SWP & CVP loss (see highlighted tables on "Annual" tab), and
- (b) monthly combined SWP & CVP loss (see highlighted tables on "Monthly" tab) -- WR table still to be generated.

I will explain in the SR loss table section how we downscaled the SR data; you should just be clear that you're using the "adjusted" SR data for the pop context numbers.
