**Subject:** Re: Peer review document production

Where'd you go? I thought you were working through the red flag IOS comment in the SRKW section and SRKW prey appendix.

Pens down was last night, so we don't have time for more reviews and addressing edits and comments, with few exceptions (e.g., peer review questions, Shasta).

American River effects is done. No calls, no walk through with Reclamation. They've reviewed and are OK.

Not sure what to make of the few appendix clean-up questions between you and Sarah, but the appendices were the first to be done.

Hi all, I'm back. Just responded to a few appendix clean-up questions from Sarah and (sort of...) caught up on e-mail. Whew, never a dull moment.

What should I help with? Is there time for me to take a stab at the American edits (since I was at the meeting on Friday, I have a sense of what DOI wants)? I would be willing to meet with Reclamation later today to go over comment by comment.

Let me know; will keep an eye on e-mail, but text the fastest way to alert me.
