Subject: EFH materials

Kymmi -- I've shared the following docs with you via google drive. As we discussed, Ian Smith of Reclamation drafted the section for us based on the Proposed Action from the original early February BA. I'll put you in touch with him in case you have any questions about his analysis, and I have already identified the section leads who can help you "screen" the EFH write-up for any needed changes to "keep up" with some PA clarifications/changes since early February. Thanks for helping with this section, and don't hesitate to ask questions on this very complex consultation!

Docs in google drive folder:

EFH V4 MASTER-SG comments 6.4.19.doc -- Current EFH section from CVP ROCON\Draft BiOp\3_MSA-EFH -- go ahead and work on this offline and once you get access to the ROCON drive, you can keep it updated there.

Chapter_4_ProposedAction_ROC_FinalBA_020119_track changes.doc -- The latest version of the PA that we have; some changes have been made even since this version but this is the most recent 'entire PA' document we have.

In ROC BA sub-folder:

ba-final-biological-assessment.pdf -- Final BA. EFH section is less than one page long, on p. 7-21 of Chapter 7.

All BA appendices: I have also uploaded Appendices A-H of the BA.

Let me know if you want draft effects or other items from our draft BiOp.

Barb

EFH and BA stuff for Kymmi
