Garwin, note this:

"many references are made to the Reinitiation BA - a decision needs to be made on which version we are using."

That's a good point. What's the decision, "term-inator"?

FWIW, we can make a placeholder EndNote entry that at least has Author: Reclamation and Year: 2019. That can be inserted into the documents with a dummy title for now. Then once we decide on the version that will be "THE" entry, we can revise the placeholder entry to reflect that, and then have EndNote update the in-text citation to correct the bibliography entry.
