Subject: Reclamation and PWA Comments on NMFS Draft ROC LTO BiOp

Maria and Howard --

As you may have seen, on Friday June 14 Reclamation transmitted to NMFS via Kiteworks 26 documents intending to provide the collected comments of the PWA community. Of those 26 documents, 8 are Word versions of sections of our draft BiOp, all with filenames including "Combined Comments". However, none of these files contains any comments or suggested revisions. There is sporadic yellow highlighting of text, but no indication of what is intended by that highlighting. See attached for an example.

With the very short amount of time that NMFS has to address any comments from Reclamation and the PWAs, I thought it worth noting early that it would be wise to confirm with Reclamation that the versions they sent capture what they intended to transmit, and, if there was an error, for them to know that this could affect our ability to address their comments.

Thanks -
Cathy
