Subject: Re: PLEASE READ--second wind--ITS

Naseem,

Using the ITS version that I commented on the take tables the other day (was it yesterday?), attached are my track changes for the text following the take tables.

I think Maria's comment about the ITS has to do with the text, where only Shasta and Delta were described. To convey a message to the ITS team, the point of the text is to clarify/describe what the take table rows can't, and is not intended to summarize the effects, etc. As such, I deleted a total of 9 pages of text that I thought were extraneous, without spending a bunch of time to delete more.

Naseem,

My first thoughts when I opened up the file were: (1) holy cow, I have to review all of that?!?; and (2), holy cow, there's obviously A LOT of time and effort that the ITS team spent in putting together the take tables and text. Major props to all.

Attached is the incidental take file, with my track changes from page 1 through the end of the IT tables. I need to review the subsequent text, but I think we can merge the text later. I accepted all of the (especially in the last column) before adding my own to lesson any potential confusion.

A lot of my track changes are redundant because the text is (necessarily) redundant, so please convey that thought, even if a given cell or row doesn't have any track changes. I think most of my track changes are associated with clarity, consistency, and clean-up, and not ones that will require a lot of thinking or pouring back in to the effects sections.

I'm here is anyone doesn't understand a comment or more.

Please post the attached in the ROCON drive.

I grabbed the IT table doc from Naseem's e-mail, and have been reviewing and track changing from my desktop. Feel free to check out the IT table file on the ROCON drive, but DO NOT edit that version, or we'll have version control issued. If anyone wants to see my interim track changes, let me know. Otherwise, I will send my complete track changes to all of you when I'm done.

Hi ManagersTrio,

Attached is the ITS in 2 parts:

Part 1, main section and take tables (new text is the last column amount/extent, and is in track changes)

Part 2, terms and conditions

Shasta seems light on terms and conditions

I'll still be doing some reviewing of these sections myself FYI.

enjoy.

Ideally some of your comments/edits can be incorporated before Maria gets it early afternoon tomorrow?

Please feel free to add suggested/required text!
