**Subject:** Adaptive Management Program

Russ, Jana and Kaylee,

Attached is a version of the 2017 Five-Agency Adaptive Management Program document revised by NMFS to remove reference to and specifics of California WaterFix. (Caveat: The appendices still need some work in this regard, but some could actually be replaced with items more specific to ROC LTO, so we stopped before working on the appendices. We also fixed some numbering that was incorrect). Also attached is a clearer copy of Figure 4-1 since the resolution of that in the document is quite poor.

Our goal is to use this as a framework into which the ROC LTO components can be applied. Also, per discussions at the 3-director meeting on this topic, we plan to bring a list of areas of uncertainty that we believe can be addressed through the AMP process. We are working on that list this week and hope to have something for discussion purposes by COB Wednesday. Looking forward to working with your agencies to further this effort.

Howard
