>From CSAMP today: Current update from DWR on Georgiana. See last slide for a “draft project description” for the next phase. They are saying they will have draft project description in May and final approved funding in June “to meet RPA”. Publicly Asked about part of ROC ON. Dave Mooney said not included for a reason I don’t understand. I signaled that we always thought this would be part of an approach to be less restrictive in south delta if could show less entrainment into the central delta. I am hoping SWC pick up on this.
