Subject: Trinity/Klamath modeling to John Hannon

Justin & Seth -- What I heard at the check-in meeting on Monday was to keep our "ask" for Trinity/Klamath modeling active, because we didn't have time to wait for things to settle...again. Given that, I've asked John to keep Trinity/Klamath Chinook production on his plate (in the context of providing Chinook production estimates to Dan for the SRKW analysis).

Please share any Trinity Division modeling results relevant to Chinook production with John and Dan (both cc'ed) as the results come in.

Thanks,
Barb

P.S. You guys may already know John, but if not, he is a very Central Valley-savvy fish biologist on loan from Reclamation's Bay Delta office to help us with our fall-run analysis. He did the same for us for the 2009 LTO BiOp.
