Subject: Wednesday Director's Call

Barry,

The main thing that I want to discuss in the Adaptive Management. Attached, for your information, is the AM briefing paper that we shared for the March 8 Director meeting and also a list of key areas of uncertainty that we have identified for cycling through AM. We have not yet share the uncertainties list outside of NMFS.

I understand that Paul will not be on the call today and has asked Kaylee to run the call. I believe Paul has directed Kaylee to suggest that we continue to work together to identify areas within the adaptive management that we have disagreement, which I am not sure is a good use of our time since we have invested many hours in meetings trying to work this through and our key differences seemed pretty established before this topic was elevated March 8.

Howard
