Subject: ROC LTO - Nimbus Hatchery Fall-run Chinook Program

Hi all,

I wanted to follow-up on our conversation yesterday about whether or not the Nimbus fall-run Chinook salmon program is part of the PA or not.

It's a little ambiguous in terms of species, but it seems the fall-run program is part of the PA based on the following sentence from the BA, page 3-21:

"Reclamation has ongoing activities that would continue, including fish hatchery programs at Coleman and Nimbus, because these facilities were intended as mitigation for the construction of CVP dams."

The PA doesn't say much more about it.
