

SEDIMENT IN STREAMS

Sources, Biological Effects, and Control

Thomas F. Waters

*Department of Fisheries and Wildlife
University of Minnesota
St. Paul, Minnesota*

American Fisheries Society Monograph 7

American Fisheries Society
Bethesda, Maryland
1995

The American Fisheries Society Monograph series is a registered serial.

A suggested citation format for this monograph is

Waters, T. F. 1995. Sediment in streams: sources, biological effects, and control.
American Fisheries Society Monograph 7.

CONTENTS

Preface	xi
Acknowledgments	xv
Common and Scientific Names of Fish Species	xvii
Conversion Factors for Units Used in this Volume	xviii
Symbols and Abbreviations	xix
Introduction	1
Objectives	2
Extent of Sediment Pollution	2
Early Studies	4
Biotic Stream Communities	5
Scope of Review	7
Previous Publications on Sediment	11
Physical Characteristics of Stream Sediments	13
Sources of Sediment	17
Agriculture	17
Row-crop Cultivation	18
Livestock Grazing	22
Forestry	24
Early Studies and the Identification of Sediment Sources	24
Long-term Research Programs	26
The Logging Road	35
Mining	36

Placer Mining	36
Surface Mining	39
Underground Mining	40
Sand and Gravel Extraction	41
Urban Development	42
Streambank Erosion	44
Miscellaneous Sources	47
Effects of Suspended Sediment	53
Effects on Primary Producers	55
Effects on Invertebrates	58
Effects on Drift	58
Redeposition of Suspended Sediment	59
Effects of Deposited Sediment on Benthic Invertebrates	61
Major Reviews	62
Substrate Particle Size	63
Substrate Embeddedness	65
Taxonomic Alteration	68
Short-term and Episodic Events	70
Sediment Sources and Invertebrates	70
Agriculture	70
Forestry	72
Mining	73
Urban Development	73
Roads and Highways	74
Sediment and Invertebrate-Fish Relationships	74
Conclusions	76
Topics that Need Further Work	77
Effects of Sediment on Fish	79
Effects of Suspended Sediment	81
Early Observations	81
Direct Mortality	81
Sublethal Effects	82
Warmwater Fishes	85
Effects on Reproductive Success of Trout and Salmon	86
Literature Overview	87
Early Research	87
Early Major Reviews	88

Sediment Particle Size and Gravel Permeability	89
Sediment in the Egg Pocket: A Finer Resolution	92
Entrapment of Emerging Sac Fry	95
Timber Harvest and Salmonid Reproduction	96
Recent Major Reviews	99
Salmonid Reproduction in Inland Trout Streams	102
Water Source for Redds: Downwelling versus Upwelling	104
The Holistic Approach to Watershed Management and Salmonid Reproduction	108
Conclusions	108
Effects on Reproductive Success of Warmwater Fishes	109
Effects of Deposited Sediment on Fish Habitat	111
Literature Overview	111
Early Observations	112
Fry Survival in Riffles	113
Pool Cover as Rearing Habitat	114
Warmwater Fish Habitat	117
Major Reviews	117
Conclusions	117
Control of Sediment	119
Prevention	119
Agriculture: Row Crops	119
Agriculture: Livestock Grazing	124
Forestry	126
Mining	135
Urban Development	143
Streambank Erosion	146
Interdiction	149
Buffer Strips	149
Sediment Traps	152
Restoration	155
Flushing Flows	157
Habitat Alteration	161
Gravel Cleaning	164
Summary	169
Sources of Sediment	169
Agriculture: Row-crop Cultivation	169
Agriculture: Livestock Grazing	170

Forestry 170
Mining 171
Urban Development 172
Streambank Erosion..... 172
Miscellaneous Sources..... 173
Biological Effects of Excess Sediment 173
 Suspended Sediment: Primary Producers..... 173
 Suspended Sediment: Invertebrates..... 173
 Deposited Sediment: Invertebrates..... 173
 Sediment and Fish..... 174
Control of Sediment 176
 Prevention 176
 Interdiction 177
 Restoration 178
Postscript..... 180
